

TUBE PROGRAM EQUALIZER HANDDRAWN WIRING LAYOUT V 1.31

[PREVIEW]

All wires from the filter units led through the according holes in the main chassis. Color code of inductor matches the vintage wiring. ECP-1 replacement inductor color code of the power filter wires matches the Triad D-7A. Also see the same wire harnesses as color of inductor units. Filter units soldered together to one and a 2-pole 11-post switch reduced to 2 positions. 2x11 pin ceramic switch is also shown in the main chassis. 2x11 pin ceramic switch is also shown in the main chassis. 2x11 pin ceramic switch is also shown in the main chassis.
